

# We take the rigid paperboard to a totally new dimension!

**The SB Fibre is 100% recyclable & FSC® certified with negative CO<sub>2</sub> emissions. Sustainable use of raw material, a very small amount goes to waste!**

## New benefits

We take the rigid paperboard to a new dimension in many ways. Perfect to print on and easy to convert to different constructions. We produce the boards up to a width of 2500mm, which give constructors the possibility to make bigger constructions from every sheet.

SB Fibre Premium has a very nice surface that doesn't crack in any direction when bending it. The thin top layer with the barrier gives the benefit of not having to laminate the surface, in order to protect it, and the board also becomes waterproof and heat (92°C) and cold resistant.

## Environmentally friendly and sustainable

The core of SB Fibre Premium is made of approximately 75% virgin fibre and 25 % recycled fibre, which gives the board fantastic strength, despite the light weight.

We produce the boards efficiently, with an extremely small amount of waste, approximately 97% of all raw material are used when we make the boards. The fact that we also use a very small amount of waterbased glue, makes SB Fibre the best choice for our common environment.

## SB Fibre Premium is 100% recyclable

The SB Fibre Premium can be recycled as paper in normal wastepaper streams, which is common everywhere throughout the world.

SB Fibre Premium has a negative CO<sub>2</sub> emission footprint, so once again, this is a very good choice to help our common environment to a better future.

## FSC Classified and Made in Sweden

All our boards are produced in Katrineholm, Sweden. The boards are FSC classified and all the paper raw material is made from controlled wood. This is extremely important for us and our customers.

## 100% Food Compliance

The SB Fibre PREMIUM & SB Fibre WHITE is 100% food compliant with food that is dry, fatty, aqueous, acidic, & also for alcoholic beverages.

## TECHNICAL SPECIFICATION

Width in mm	1220, 1600, 2030, 2400, 2500
Length in mm	1200 – 4200 mm
Thickness	Standard 10mm & 16mm
Liner grammage (g/m <sup>2</sup> )	405g
Weight (kg/m <sup>2</sup> )	1,6 kg (10mm), 2,1 kg (16mm)
Tolerance in mm corner curvature from flat	<10mm
Tolerance in mm in length and width	+/- 3mm
100% Food Compliant	Dry, fatty, aqueous, acidic & alcoholic
